

CI/CD

Continues Integration / Continues Deployment

# Benefits of CI/CD

- Save time.
- Save Money.
- Save extra effort.

# Save time

**In old way of deployment we waste more time in :**

1. Build infrastructure manually.
2. Test and analyze software.
3. Deliver software to production.

**In CI/CD we do that automatically.**

## **Save money**

**With CI/CD developers will gain more time to do their jobs than handle deployments issues so that company may reduce number of developers that mean reduce cost.**

## **Save extra effort**

**If developers focus on their main job that will increase their productivity and quality of work.**
